

## 學雜費調整理由、計算方法

### The rationale and formula of adjusting tuition fee

#### 一、本校今年沒有調整學雜費

CCT does not adjust tuition fee this year.

#### 二、如需調整學雜費之情況與計算方式，如下說明，

Descriptions of the rationale and formula of adjusting tuition fee are as following,

1. 當物價指數、教學成本、教學資源、或營運成本增加時，為學校的永續經營的學雜費而有常態調整機制。

When the consumer price index, teaching cost, teaching resources, or school operating cost increases, for school sustainable development, so that school has normal adjusting tuition mechanism.

2. 教學成本計算以教學研究與訓輔支出、獎學金支出、行政管理支出為主。Teaching cost is sum of teaching research and counseling expense, scholarship expense, and administrative management expense.

3. 教育部提供可調整的指標：前一年的經濟成長率超過 3%，與獎助學金占支出比例超過 3%

MOE provides indicators that school may adjust tuition: the previous year's economic growth rate above 3%, and the previous years' scholarship expense over 3% of school all expense.
